QRR has made a survey of its divisions on the question of whether they desire the reporting of information in scheduled reports as is the current practice or on 5 x 8 cards. The result was a divergence of opinion among the analysts but I am informed by [redacted] today that QRR would like to stand on the opinion expressed in [redacted] memorandum of 30 November 1954 attached. [redacted] CIA member of the Subcommittee on Exploitation of Foreign Language Publications, has not raised the point during the Subcommittee's review of the USSR program just completed.

FDD finds that some analysts would prefer reporting on cards but the majority of consumers prefer the periodic report which assures the analysts of receiving all the reported information for a given period rather than placing his dependence on a reading panel for full coverage.
